

**BUZICK**  
CONSTRUCTION INC.

## **SAFETY POLICY STATEMENT**

Safety is a core value in all of our operations at Buzick Construction. We are committed to developing, implementing, maintaining and constantly improving strategies and processes. Buzick Construction's business activities operate under a balanced allocation of resources, aimed at achieving the highest level of safety performance, and meeting or exceeding regulatory standards while delivering our services.

All levels of management and all employees are accountable for the delivery of this highest level of safety performance, starting with the President.

Our commitment is to:

- **Support** the management of safety through the provision of all appropriate resources, that will result in an organizational culture that fosters safe practices, encourages effective safety reporting and communication, and actively manages safety with the same attention to results as the attention to the results of the other management systems of the organization;
- **Enforce** the management of safety as a primary responsibility of all managers and employees;
- **Clearly** define for all staff, managers and employees alike, their accountabilities and responsibilities for the delivery of the organization's safety performance and the performance of our safety management system;
- **Establish and operate** hazard identification and risk management processes, including a hazard reporting system, in order to eliminate or mitigate the safety risks of the consequences of hazards resulting from our operations or activities to a point which is as low as reasonably practicable (ALARP);
- **Ensure** that no action will be taken against any employee who discloses a safety concern through the hazard reporting system, unless such disclosure indicates, beyond any reasonable doubt, an illegal act, gross negligence, or a deliberate or willful disregard of regulations or procedures;
- **Comply** with and, wherever possible, exceed, legislative and regulatory requirements and standards;
- **Ensure** that sufficient skilled and trained human resources are available to implement safety strategies and processes;
- **Ensure** that all staff are provided with adequate and appropriate safety information and training, are competent in safety matters, and are allocated only tasks commensurate with their skills;
- **Establish and measure** our safety performance against realistic safety performance indicators and safety performance targets;
- **Continually improve** our safety performance through management processes that ensure that relevant safety action is taken and is effective; and
- **Ensure** adequate supply of personal protective equipment is provided to support our operations.
